PROFESSIONAL SUMMARY

Aspiring Data Analyst with a Mathematical Engineering background and hands-on project experience across the full data lifecycle — collecting, cleaning, analyzing, and visualizing data with SQL, Python, Excel, and Power BI. Built an original 52,946-article dataset with a Python scraping pipeline and delivered interactive dashboards uncovering churn and profitability insights. Eager to apply strong analytical and problem-solving skills in a junior data analyst role.

CORE SKILLS

Data Analytics: Data Analysis, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization & Reporting, Data Storytelling, Reporting Automation

Technical Skills: SQL (joins, aggregation, window functions), Python (Pandas, NumPy, Matplotlib, Seaborn, BeautifulSoup), Advanced Microsoft Excel, Power BI (DAX, Data Modeling, Dashboards), Web Scraping, Git

TECHNICAL PROJECTS

Credit Card Churn — Interactive Power BI Dashboard — *Power BI · Power Query · DAX · Slicers*

- Built an interactive dashboard analyzing why 10,127 credit card customers leave, using Power Query for cleaning and DAX measures for the model.
- Surfaced 16.07% overall churn — highest among customers inactive for 3 months and low-income segments (under \$40K), flagging clear retention levers.

Oxu.az News Dataset — Python Web Scraping & EDA — *Python · Web Scraping · EDA · Kaggle*

- Designed a Python pipeline scraping 13 categories to collect metadata and reader reactions for 52,946 Azerbaijani news articles; published the dataset on Kaggle.
- Analysis revealed Sports as the most-written category (5,812 articles) while Society is the most-read — a gap between editorial focus and audience interest.

Global Superstore — Interactive Excel Dashboard — *Excel · Power Query · Power Pivot · DAX*

- Developed a fully interactive dashboard with Power Query, Power Pivot, DAX, and PivotCharts to analyze sales and profitability.
- Identified Central as the sales leader (\$2.8M) and showed Technology drives profit despite lower unit volume — informing product-mix decisions.

PROFESSIONAL EXPERIENCE

Teaching Assistant

02/2023 – 05/2023

Israel Azerbaijan Training Center — Baku, Azerbaijan

- Supported the instructor on a data analytics course, guiding students through Python, SQL, and statistics in the lab.
- Reviewed student analyses and broke down difficult concepts to improve learning outcomes.

Data Analyst Intern

09/2021 – 03/2022

International Training & Project Center — Baku, Azerbaijan

- Cleaned and analyzed large datasets using statistical techniques, identifying trends to generate actionable business insights.
- Designed reports and visualizations to present project progress to stakeholders.

EDUCATION

BSc in Mathematical Engineering

09/2018 – 09/2022

Yildiz Technical University — Istanbul, Türkiye

CERTIFICATIONS & TRAINING

- Data Science with Python — Data SoCool (05/2024)
- Programming Essentials in Python (PCAP) — Cisco Networking Academy · OpenEDG Python Institute (03/2023)

AWARDS & ACHIEVEMENTS

- Investigation of Brain Tumor Segmentation Using U-Net Architecture — TUBITAK (11/2022 – 11/2024)
